Amendments to the Abstract:

Please amended the Abstract of the Disclosure as follows:

A codable electronic circuit arrangement, in particular an LED circuit arrangement (1), having a lead (3), via which electronic circuit elements (6) of the circuit arrangement, in particular LED components, can be driven by a drive circuit (2; 20; 21; 22). The lead (3) has a plurality of coding conductors (3c, 3d), which carry a code ~~by means of~~ via a combination of electrically interrupted and electrically continuous coding conductors (3c, 3d), ~~said~~ wherein the code ~~giving~~ gives an indication of specific properties of the circuit arrangement.
